West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form

Title: Emile Buzaid, Assistant Secretary

Project No:	Project Title: Sawdust Diversion
1. Executive Summary: (Include specific information about the project as well as how the project is Beneficial, who it benefits and the evaluation methods used to quantitatively and qualitatively measure success of the project. Answer within the space provided.)	

**West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form**

Project No:

Project Title: Sawdust Diversion

1. Executive Summary (Continued)

Remington Arms is located at 1950 Roncell Road in Lexington MO. This Remington Plant in Lexington is a gunstock (woodworking) manufacturer. A map is attached to this application (Appendix 5) to show where this plant is located. Remington Arms is a privately-owned company. This owner is Cerberus Capital Management. I am Cody Luckenbach the Environmental Health and Safety Supervisor for the Lexington Missouri gunstock manufacturing plant. It is my job to ensure the safety of all our employees as well as ensuring we are adhering to all governmental regulations. Our plant takes a wooden rectangle blanks and use different types of machines to shape the wood blank into a gunstock. This process creates a lot of wood dust. For the comfort and safety of our employees we pneumatically take the sawdust from each machine and transport it out of the plant through a dust collection system. This system was funded by the Community Development Block Grant in 2017 for 1.6 million. A part of this grant process we obtained documentation that the dust collection system belongs to Remington Arms and would move with the plant if the plant were to move. (See Appendix 11) The system we are looking to build with the solid waste grant funds will be a part of the dust collection system and will move with the plant if the plant were to move. The dust collection system belongs to Remington Arms and does not belong to the landlord. This dust collection system takes the sawdust from inside the plant and places it outside in a 40-yard dumpster.

**West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form**

After the dumpster is full it is taken to the landfill. Some sawdust is lost into the air and the ground due to the fact the dumpster is not 100% sealed.

The need for this project would be to divert the sawdust from a landfill (current state). This project will accomplish this by taking our sawdust to Systech in Sugar Creek Missouri. Systech will use the dust as a bio-fuel. With the help of this grant we are looking at purchasing an air transfer system that will take the sawdust from our dust collectors and place the sawdust into a sealed dumpster. The system will be a closed self-contained system that will contain almost 100% of the sawdust leaving the plant. Currently we are pneumatically feeding our sawdust into a dumpster. This is done by a plastic pipe that is driven by a motor that pushes sawdust into the dumpster. The dumpster can't be sealed since there is pressure by the blower. Some sawdust escapes out of the dumpster. Systech has agreed to take our sawdust and use it as a bio-fuel. An attachment of a letter stating this agreement can be found in appendix 9. The need for this project would be to help Remington become better stewards of the environment and divert hundreds of tons of sawdust from a landfill (See performance measures worksheet in Appendix 1). Our sawdust will assist Systech because they will in turn provide the dust to a Central Plains Cement Plant. This Cement Plant will then gain a cheaper efficient fuel source. We currently have a contact with Triple AAA to provide dumpsters and transportation for our sawdust. With the award of this grant Triple AAA has agreed to transport Remington's sawdust to Systech for at least a period of 5 years and Triple AAA has also agreed not to take the sawdust to a landfill. A letter speaking to this is attached to this application in appendix 9. This will retain a job by keeping Triple AAA disposal as your dumpster transporter. The timetable of this project will be 60 days of the grant awarded. This time frame will allow Remington to obtain a purchase order to purchase the system and give Paper and Dust Pro enough time to install the new system. It is Remington Arms intention to complete this project as soon as possible.

This project involves three companies in our local community. The targeted clients would be Triple AAA (Oak Grove Missouri), Paper and Dust Pro (Grandview Missouri) & Systech (Sugar Creek, Missouri). Systech has agreed to take our sawdust for the next 5 years. Systech has agreements with Central Plains Cement Plant (Sugar Creek Missouri) to provide them with bio-fuel. Triple AAA Disposal will take the dumpster to Sugar Creek (Systech) from our plant. Triple AAA have special trucks that can pick up dumpsters and empty them at Systech. This is something Remington cannot do on its own. Remington will be paying the ongoing cost for the transportation of the dumpster and the dump fee at Systech. This cost is already factored in Remington's 2018 budget. Paper and Dust Pros will be designing and installing the air transfer system. This project will positively impact several parties involved. This project will also enhance the employment of Systech since they have contracted services for bio-fuel and they would be receiving over 150 tons of sawdust a year. In addition this project will positively affect the Central Plains Cement plant that Systech provides the dust for. This project will create more work for Paper and Dust Pro for building and installing the air transfer system. We will also be keeping Triple AAA employed for the next 5 years by having this agreement with them to be our sawdust transporter. Finally, this project will also serve the community of Lexington by helping Remington control their air emissions and becoming better stewards of the environment. This project is very likely to be sustained. Little work from Remington Arms is required to keep the project going once its installed. All Remington Arms will have to do is un-hook the dumpster when its ready to be picked up and hook up the new dumpster when its brought back. The costs for Remington arms will remain the same.

District Match Commitment

Remington Arms is prepared to make the required 15% match to for the project. Remington will issue a PO in which Paper and Dust Pro will invoice to. Upon invoice Remington will pay the required amount. Letter can be found in Appendix 4

**West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form**

Quantitatively the amount of sawdust emitted out of the dis-charge is calculated by tracking the production shipments of the plant. The gunstocks that come into the facility prior to being manufactured have been weighed. The stocks are then weighed after they have been manufactured (gone throughout machines). These machines sand/saw/cut and shape wood. The wood dust created by this process is captured via our dust collection system and transported pneumatically out of the plant and into the discharge point(dumpster). The weight difference between the gunstocks pre- and post-manufactured would be the amount of sawdust currently being dis-charged inside the dumpster. This can easily be tracked by taking the number of gunstocks shipped (manufactured) and multiply by the weight difference (pre/post manufactured). That total weight difference of the gunstocks shipped will be the amount of sawdust that is dis-charged into the dumpster. A 5% figure will be added to the total shipment (manufactured) to account for scrap parts that were not shipped but were manufactured through our machines. The shipment totals are a report that is emailed to myself and other Remington employees weekly. Each week I will plug in the shipment totals in a pre-calculated excel sheet that will have the weight totals already calculated. This spreadsheet will give me a number for sawdust sent to the dumpster that week. Remington also tracks the shipment totals to calculate the emissions for EP-18. Tracking Remington shipments is already required to be tracked by a Construction Permit with the Missouri Department of Natural Resources. In 2016 we produced approximately 250 tons of sawdust. In 2017 we produced 150 tons of sawdust. Our projected amount for 2018 and beyond is at least 150 tons. Production is going up so this number can grow. This is our estimate of how much sawdust will be diverted because of this project. See appendix 13. We will use this same spreadsheet to calculate the sawdust being transported to the dumpster (diverted from the landfill) for the quarterly and final reports.

Qualitatively with the completion of this project we will capture more sawdust since the container will be sealed and the equipment purchased with this grant will take all the sawdust to the sealed dumpster. This new system will transfer the dust from the plant, through the dust collection and into our sealed containers. It will be sealed 100% of the time and Remington Arms will no longer have emissions from this emission unit. Due to this fact our projection of 150 tons will likely increase due to the fact we are capturing more dust. The ambient air around the facility will also be improved since 100% of the PM 10 emission from the sawdust dis-charge will be contained. This will improve environmental quality for our employees and the community around the plant.

This project will be located at 1950 Roncelli Road in Lexington Missouri. The discharge point is North of the plant outside the dock. See aerial photo of the plant in appendix 8.

This application and all supporting document were printed on 30% recycled paper. See picture at the end of the application.

2018 Grant Application Profile Form**

Emile Buzaid

2. Miscellaneous Items Sign Here:

- A. By signing and dating below, the official authorized to sign for the grant applicant attests that all applicable federal, state and local permits, approvals, licenses or waivers necessary to implement the project are either not needed or have been obtained or applied for and will be obtained prior to award.**
- B. By signing and dating below, the official authorized to sign for the grant applicant attests that this project follows local zoning ordinances. See appendix 4 for all city, county and state letters regarding permits, licenses and zones.**

3. Physical Location of Project:

Address Line 1:	1950 Roncelli Rd
Address Line 2:	
City:	Lexington
State:	MO
Zip Code:	64076

4. Work Plan: Identify project task as task 1, task 2, etc. and provide an explanation of each.

Project Tasks & Work Plan

- 1. Purchase system to contain/transport sawdust from the plant. - Quote has already been obtained with Paper and Dust Pro and included in this application Appendix 6 A drawing of the system is also included in Appendix 6. Paper and Dust Pro is our sole source vendor for this project. See Appendix 10**
- 2. Paper and Dust Pro install the air transfer system upon receipt of the purchase order. Paper and Dust Pro will use their contractors to hook the air transfer system from the existing dust collection dis-charge to our sealed**

**West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form**

container. They will bring all the necessary equipment from their facility in Grandview or have it shipped at our site for this project.

3. During the installation of the air transfer system Triple AAA will seal their containers to ensure it contains all the sawdust. They have fabricators at their site that will enclose the dumpster to ensure that no sawdust can escape. They can also make any necessary mortification to their dumpsters to ensure the air transfer system will be compatible

4. Triple AAA will take sawdust from Remington Arms to Systech in Sugar Creek Missouri. Currently we have an agreement with Triple AAA. They pick up our sawdust every 10 business days at our plant in Lexington Missouri. Under the new agreement we will have with them, we will continue this process.

5. Record how much sawdust was taken on each trip via a tracking spreadsheet created by Remington (See appendix (on-going). This will be tracked weekly by Cody Luckenbach

6. Release a press release in the local community about the project. Remington Arms will release a press release in the local community to show case the project.

7. Post signage of the project on the equipment

8. Perform a tour of the project to Region F Solid Waste District, city of Lexington and other interested parties. Remington Arms will set up a tour of the grant project to all parties that are interested in seeing the new system

9. Submit quarterly reports to DNR on amount of sawdust sent to Systech

10. Submit final report to DNR on amount of sawdust sent to Systech

11. File UCC with the Secretary of State

12. Provide proof of insurance to the district on the equipment

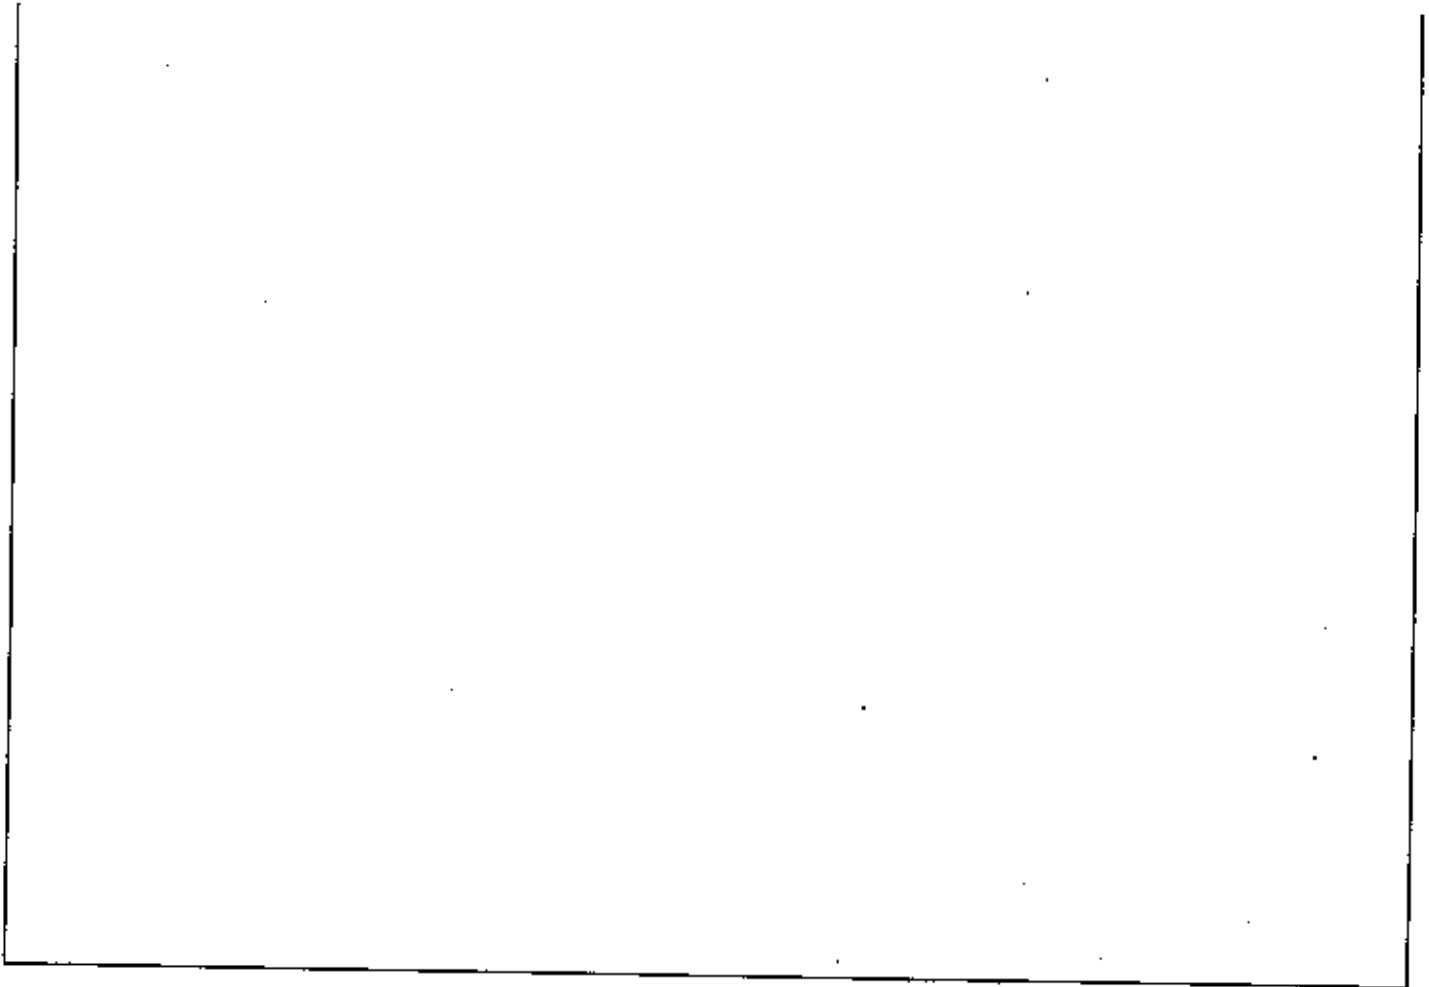

West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form

5. Key Personnel and Qualifications: Resumes may be attached or provide below a description of qualifications of key personnel assigned to the project especially the project manager.

1. Cody Luckenbach- Environmental Health and Safety Manager for Remington Arms. Cody has a master's degree in Occupational Safety Manager and over 5 years of experience in dealing with environmental health & safety compliance. It is his job to ensure compliance with government regulations ensuring the safety of all Remington's employees at the Lexington MO site. This includes writing procedures, performing training and conducting numerous inspections around the plant. Another important aspect of his job is to protect the environment and reduce Remington's footprint on the environment. He has managed numerous projects including a machine guarding project that took almost a year to complete and cost more a million dollars. This machine guarding project involved numerous contractors, weekly metric reporting and budget tracking. Cody will manage this entire project including purchasing the equipment, ensuring government regulations are followed, supervising contractors, managing inventory and overseeing that the entire project was done on time.

2. Fred Gunn Plant Manager has been with management with Remington Arms for 27 years. Fred has overseen several large-scale products that included moving whole machine lines to the plant and implementing new product lines. These projects include machine lines for H & R and Marlin firearms. These projects required moving more than several \$100,000 dollars' worth of equipment from another location to our present location. Fred was responsible in ensuring that these machines produced a quality product on time and in budget. Fred also led efforts to implement a spray booth operation in the back of this plant. This project required the installation of overhead spray booths that were to be used to spray long stocks. Most of these machines are still in operation today. Fred oversees all plant operations in the plant. His leadership includes the following areas: production, quality and overall operations of the plant. Fred has about 80 personnel that report to him. He has the authority to ensure this project gets completed.

7. Budget Detail Narrative: For Cost Categories having line items with cost of \$3,000.00 or more, provide a brief explanation of why the item is needed and the methodology used for estimating the cost.

The air transfer system will be designed and installed by Paper and Dust Pros. The system requires the contractor to take duct work from the discharge point of the dust collection system and connect it to dumpster. The dumpster will have an inlet (blowing air/dust in) and outlet (sucking air out). The out part will have a filter to keep the dust in. With the completion of this system would allow us to seal the container and in turn contain all the sawdust coming from the plant. The quote included in this application includes the design, equipment purchases and installation of the system. This system costs \$25,000. See Appendix 6 for the quote and drawing

The total cost of the project will be \$25,000 We are looking at a grant to pay for 85% of the project and Remington Arms will pay for 15% of the project.

**West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form**

Appendix 1 Performance Measures Checklist

Use the following worksheet to help you develop your estimate for the waste diversion to be reported for the life of the grant project. Once the project is fully operational, twelve full months of diversion reporting is required and you may be reporting diversion for a partial month(s).

Type of Waste Diverted	Total Tonnage for Life of Grant Project	Type of Waste Diverted	Total Tonnage for Life of Grant Project	Type of Waste Diverted	Total Tonnage for Life of Grant Project	Type of Waste Diverted	Total Tonnage for Life of Grant Project
Cardboard		Other Paper		Clear Glass		Other Glass	
Newspaper				Brown Glass			
Magazines				Other Glass

							5 August 150 tons

Other performance measures to consider dependent on the type of your project:

Estimated Jobs to be Created	0
Estimated Jobs to be Retained	1
Estimated individuals Attending Training Provided	1
Other Measurable Outcome:	Diverting 150lbs or more of sand/dust from a land fill.
Improving the ambient air around the plant & surrounding community.	Improving air quality for our employees, contractors & neighbors.
Reduce Remington impact on the environment.	

West Central Missouri Solid Waste Management District - Region F
2018 Grant Application Profile Form

Appendix 2 Budget Worksheet

Equipment Description	Page/Attachment to application with description	Estimated # of units	Cost per unit	Total Cost
Air Transfer System	Quote #1-22 Description Executive Summary 5-6	1	\$25,000	\$25,000
Total Amount				25,000

For items with an estimated cost of more than \$3,000.00, one quote/estimate is required. If you communicate directly with the vendor, you should let them know you are requesting the quote for budgetary purposes only and may not receive a grant to make a purchase. Additionally, upon grant award you will be required to obtain a formal bid from at least 3 sources prior to purchase of the equipment.

For items with an estimated cost of more than \$25,000.00, regardless of whether the line item is for one or multiple units, one formal quote from a vendor on their letterhead is required to be attached to the grant application. If you communicate directly with the vendor, you should let them know you are requesting the quote for budgetary purposes only and may not receive a grant to make a purchase. Additionally, upon grant award you will be required to competitively bid for purchase of the equipment/vehicle, etc.

Supplies:

"Supplies" means all tangible personal property other than equipment/vehicles, building and building site improvements. No documentation is required for the application unless a line item is estimated to cost more than \$3,000.00.

For items with an estimated cost of more than \$3,000.00, one quote/estimate is required. If you communicate directly with the vendor, you should let them know you are requesting the quote for budgetary purposes only and may not receive a grant to make a purchase. Additionally, upon grant award you will be required to obtain a formal bid from at least 3 sources prior to purchase of the supplies.

DESCRIBE: Triple AAA agreed to transport sawdust for 5 years.

11. PROJECT DESCRIPTION (LENGTH 1,000 CHARACTERS OR LESS)

Remington Arma makes wooden gunstocks and the sawdust from production operations is transported via dust collection system to an outside dumpster. With the completion of this project the new system will contain almost 100% of the sawdust from the dust collection to a new sealed dumpster. When the container is full it will be transported by Triple AAA Dipscoel and taken to Systech which re-uses the sawdust as bio-fuel.

RE: Dust Loadout System

Dear Mr. Lockenbach,

At this time, we are pleased to present to you the following proposal for the above referenced work for your review and consideration.

SCOPE OF WORK

We propose to design furnish and install a material transfer system that would divert collected saw dust from the existing transfer system to one of two enclosed storage containers per the attached sketch.

Materials and Equipment to be provided

- Manually operated divert valves
- Ducting and fittings
- Hangers and supports
- Installation labor
- Engineering and design labor

Our Price for this work is \$25,000.00

Appendix 7 Letters from City, County and State Government
Storm Water Permit Letter

MAR 21 2018

Mr. Cody Luokenbach
Remington Arms Company, LLC
1450 Remount Road
Lexington, MO 64067

Dear Mr. Luokenbach:

The Missouri Department of Natural Resources' Kansas City Regional Office received your request to review your water pollution permit status for a grant with the Missouri Solid Waste District, Missouri State Operating Permits MO-R22C032 and MO-R22C027 currently cover both Remington Arms Company properties in Lexington, Building 1 and Building 3, respectively. The project for the grant, as you described it, would not require any additional water pollution permits from the Department. The system you described may even reduce your requirements to have a permit and allow you to operate under a No Response Exception Certification from storm water permits provided there are no activities or materials exposed to storm water.

Thank you for taking the time to understand the regulations regarding your project before starting it. If you have any questions or need any further information, please contact me by mail at the Kansas City Regional Office, 500 Northeast Colborn Road, Lee's Summit, Missouri 64086-4710, by email at kate.williams@dnr.mo.gov or by telephone at (816) 251-0747.

Sincerely,

KANSAS CITY REGIONAL OFFICE

RE: New Source Review Permit Applicability- Project Number: 2018-03-030
Installation ID: 107-0014

Dear Mr. Luckenbach:

Your request for a determination of permit need for increased emission controls on the powder collection system was reviewed by my staff. According to Missouri State Rule 10 CSR 10-6.061, *Construction Permit Exemption*, no construction permit is required from the Missouri Air Pollution Control Program.

Currently, Remington Arms Company, LLC blows their powder into a closed dumpster (EP-18) that is not completely sealed so the dumpster would become pressurized. Remington plans on getting a gravity fed system that will feed into a completely sealed dumpster. The new system will allow the dumpster to be de-pressurized, that way it's sealed and will contain all the powder. The completely sealed dumpster will be a decrease in powder contained from this emission point (EP-18). Since the proposed replacement does not increase the potential to emit, the change is not considered a modification and no permit is required.

EP-18 remains subject to Special Condition 2 of permit #42012-009A. Remington shall continue to track emission using Attachment A of permit #42012-009A in order to show compliance with the emissions limitations on EP-18.

You are still obligated to meet all applicable air pollution control rules, Department of Natural Resources' rules, or any other applicable federal, state, or local agency regulations. Specifically, you should avoid violating 10 CSR 10-6.045 *Open Burning Requirements*, 10 CSR 10-6.165 *Restriction of Emission of Odors*, and 10 CSR 10-6.170 *Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin*.

Triple AAA Disposal

AAA DISPOSAL SERVICE, INC.

Residential • Commercial • Industrial
Since 1983

Dear Remington Arms and Region F Solid Waste District

My name is Jassen Holmberg and I am the President of AAA Disposal Service, Inc. based out of Buckner Missouri. I have been in business in the local community for over 35 years. I have been working with Remington Arms in Lexington since 2008. Starting in 2017 I worked directly with Cody Luckenbach on designing a closed dumpster for their sawdust discharge. He has explained the great process to me and the design of their new sawdust discharge system. I believe their system will work well with our dumpster. It is my intention to commit to Remington Arms to continue to be their transporter of sawdust. I am willing to commit for the next 5 years to take Remington Arm's sawdust to Systech in Sugar Creek Missouri instead of taking the sawdust to a landfill. I look forward to this commitment and continued relationship with Remington Arms.

Jassen Holmberg

President

3-27-2018

Systemch Commitment Letter

2200 NORTH COURTNEY ROAD • SUGAR CREEK, MO 64080-6201 • PH: 816-387-3601 • FAX: 816-267-2171

Systemch Environmental is a company that sources materials like wood and plastic to a cement kiln in Sugar Creek, MO to be used as an alternate fuel replacing traditional, non-renewable fossil fuels like coal. This would be a new partnership between Remington and Systemch. Remington would pay AAA Disposal to take a 400 yard dumpster of sawdust to Systemch. Systemch will then take the sawdust to be used as a biofuel. This would divert 100% of Remington's sawdust from a landfill.

It is our intent to accept Remington's sawdust that they take to our facility. We would commit to accepting their sawdust as early as May of 2018. It is our intent though, to keep this arrangement with Remington for at least the next 5 years. This letter is showing commitment to Remington Arms in helping them divert their byproduct (sawdust) from a landfill and using it as a renewable energy source.

Signed

Jeff Loulos

April 3, 2018

RE: Dust Loadout System

To Whom it May Concern,

My name is John Prouty the President of Paper and Dust Pros. I am writing this letter to explain why we are the only company that can supply Remington Arms with the air transfer system. The air transfer system must be specifically designed to the dust collection system installed for Remington in 2017. We are the only company that can adapt our design to feed the dumpster that will work with our system. Therefore, no other company can supply the air transfer system for Remington sawdust diversion project except for Paper and Dust Pros. The air transfer system had to tie into the dust collector system in a specific way otherwise it won't work. We are the only company that can do this properly.

Sincerely

**John K. Prouty

**\$1.6 million state grant keeps
Remington Arms open**
Money allows for upgrades, keeps the company in
Lexington for 5 more years

West Central Missouri Solid Waste Management District - Region F 2018 Grant Application Profile Form

Remington Arms received a state grant of \$1.6 million to make upgrades to the dust ventilation collection systems at its two buildings in Lexington. As part of the agreement, Remington Arms must maintain a minimum of 80 jobs and stay in town for the next five years. (Photo by Leah Wankum/Richmond News)

By Leah Wankum, Editor

A state grant to make upgrades at Remington Arms Company LLC saved it from closing down.

The Lexington-based firearms manufacturing facility received a grant of \$1.6 million from the Missouri Department of Economic Development to make equipment and machinery upgrades. Part of the arrangement for the Community Development Block Grant requires that Remington Arms maintains at least 80 existing jobs.

“Supporting our state’s existing businesses is the surest way to grow our economy,” said Rob Dixon, acting director of the economic development department, in a statement. “We are proud to work with communities to make it easier for companies to do business in rural Missouri. These upgrades will allow Remington to compete in the global marketplace and pave the way for growth opportunities in the future.”

The complete story is in the Friday, July 21, 2017 Richmond News.
