AND WHAT ACTIONS DID THE DISTRICT TAKE TO ACHIEVE THESE GOALS?

(3 (a). What waste goals did the district have for the fiscal year period and what actions did the district take to achieve these goals?)

1. Implement education and incentives strategies to address community needs and contribute to the waste diversion goal.

- The SFCC Renewable Energy program began with 32 students and has increased to 38 this year. One person has graduated which is to be expected with the program just starting.

- The Waste-to-Energy project is underway, The Waste-to-Energy business incubator needs an occupant.

2. Adopt sustainable solutions for long-term success that include developing financial incentives for greater recovery and reuse of waste materials, increase recycled content procurement.

- The primary challenges that the region is facing are the lack of business expansion opportunities due to the current economic conditions, the increasing cost of materials and declining grant resources to maintain and expand public infrastructure. In addition, the limited funding in the Workforce Investment Act is insufficient to address the growing needs of the unemployed and underemployed in the regional workforce. Resources at the community level to allocate to planning and economic development efforts are also very limited.

3. Explore alternative funding sources

- The declining amount of state and federal grant resources and programs are limiting the opportunities to secure financing for regional development needs.

4. Establish public private partnerships to leverage available resources.

- The development of a materials exchange web-site. This site will be set up so that materials that may normally be placed in a landfill can be placed on the site. Then individuals that may need the items can consult the site, find the items and pick them up from the entity that initially has the materials. An example would be construction materials,• Staff has worked to define partner roles, responsibi
